

# Charlotte County Government

"To exceed expectations in the delivery of public services."

[www.CharlotteCountyFL.gov](http://www.CharlotteCountyFL.gov)

Dear Property Owner:

Exciting activity is about to occur in your neighborhood and we want to offer you another opportunity to hear firsthand how the project is progressing and continue to provide you with information that will be of value to your family. Charlotte Utilities (CCU) invites you to an educational and information sharing workshop. CCU will provide you with information about the sewer project coming to your community. In addition, you will also have an opportunity to learn ways to maintain landscaping in a "Florida Friendly" way.

Communication is very important, and we want to make sure you have every opportunity to be informed about the enhancements coming to your neighborhood. On Monday August 18, 2014, please join us during one of two sessions on either:

- Monday August 18, 2014 3 p.m. to 5p.m or
- Monday August 18, 2014 5 p.m. to 7 p.m.

Location will be Charlotte County Environmental Campus, 25550 Harborview Road, Port Charlotte, FL.

The workshops will offer you the opportunity to hear from CCU staff and our contractors who will be working in your neighborhood installing the low pressure sewer mains and improving storm water management facilities within the right of way in your neighborhood and the steps towards making the sewer connection at your property. We will share a project update as well as what you can expect and how your property will be impacted. A copy of the plans will be available to you to see the improvements that will occur at your property. Soon we will be hard at work constructing the improvements necessary for neighborhood homes to be connected to the central sewer system.

You will also hear from horticulture staff at The University of Florida Institute of Food and Agricultural Sciences. They will provide tips for inexpensive ways to improve your lawn and landscape using Florida Friendly Landscaping™ techniques. Using these techniques will lower the time it takes for you to maintain your yard while saving water and reducing the need for fertilizer and pesticides leading to a more attractive, functional and ecologically-sound yard. Those attending will receive free "Florida Friendly" (mostly native) plant seedlings and be entered in a drawing for a free Charlotte County rain barrel.

We look forward to seeing you soon and thank you. Please contact us if you have any questions.

Sincerely,

Ruta Vardys, PE  
Engineer III
